DETAILED ACTION

Remarks

The following restriction is being made in careful reconsideration of the application and the inventions disclosed therein. In accordance with 37 C.F.R. 1.142(a), as stated below, the distinctness and independence of the inventions are made clear, and thus this restriction requirement is made. 37 C.F.R. 1.142(a) indicates that such requirement may be made before any action on the merits; however, it may be made at any time before final action in the case, at the discretion of the examiner.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a method of populating a data structure and a program product, classified in class 706, subclass 45.
- II. Claims 31-44, drawn to a label generating system, classified in class 712, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the label generating system of II are structurally different and is not limited to the program product of the method of populating a data structure and a program product of II.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Inquiries

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Young J. Kim whose telephone number is (703) 308-9348. The Examiner can normally be reached from 8:30 a.m. to 6:00 p.m. on weekdays.
